

„Heat Master®“ Heating carpet – with foot switch

The „Heat Master®“ Heating carpet

The „Heat Master®“ heating carpet provides comfortable heat in the foot area and supports the well-being. Coldness from the floor in offices, at home, in hobby- and cashier areas as well as in sales booth's are prevented.

The heating conductor – stitched onto a fibreglass mesh – are placed between two carpets, afterwards their edgings gets a overcast seam with a matched yarn.

With their high heat output, these carpets heat rapidly and effectively.

The hard-wearing carpeting matches any surroundings.

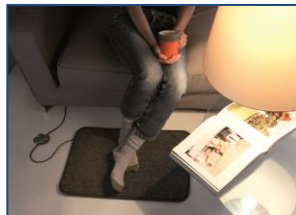

The heating carpet naturally has a temperature limiter (60°C) to protect against overheating in case of operating errors.

- Electrically heated carpet for indoor use
- Design in 230 Volt , with around 2 m-long-connection cable with flat plug and build-in **foot switch for on / off function (LED lights up during operation)**.
- **Colors: anthracite, bordeaux, cognac**
- Very low power consumption, depending of the size of the Heat Master®

Construction of the cable

Voltage:	230 V AC
Outer diameter:	approx. 1,5 mm
Specific heat output per m:	6 W
Supply line:	1 x 2 m, 0,75 mm ² , with switch

Description	Dimensions in cm	Power in Watt
Heat Master FH 21024-FS	40 x 60	75
Heat Master FH 21035-FS	50 x 70	100
